

## 2024 HSC Industrial Technology MAJOR PROJECT

# Statement of Intent

### Name

Toby

Joyce

### Product

Desk with Curved  
Drawers

#### Intention:

My objective was to construct a high-quality functioning desk tailored for use in my home.

#### Motivation:

I am motivated by the opportunity to leverage my existing woodworking skills while pushing myself to acquire new ones.

#### Function:

My desk must function as a place to study or complete work and must keep work tasks organised and efficient. It needed to be durable enough to ensure longevity and have strong resilience with daily use.

#### Aesthetics:

The desk needed to harmonise with the colour scheme and aesthetic of my room, which meant the desk needed to be built with lighter timber and with a more modern style and shape. It was designed to look like an integral part of the space.
