Creative Space  
Redesign

## **AREA OF DESIGN**

Architecture

For my Major Design Project, I have chosen to redesign the creative spaces and studios places such as around the area of Manly, Avalon and Curl Curl. This is due to it being close to my home and identifying the need for a newer space for people to show off their creative skills within a gallery and notice younger talented artists within the beaches community.

There is a genuine need for all these buildings to be redesigned, but focusing on Manly's creative spaces/studio can build an example of what the others can look like if changed in the future. It is also a very manageable-sized studio, and therefore can lead to increased aesthetically appealing detail and architecture.
