MAJOR PROJECT

Statement of Intent

NAME

Liam
Parker

PRODUCT

Acute Desk

My Intention is to make an “Acute Desk” because I spend a lot of time working at my desk. My current desk is not able to support the amount of work I am doing and it is an unstable Ikea desk that needs to be replaced.

My other motivation to complete this desk is to have a new, functional desk for my next adventures when I leave school, whether that is going to university or other ventures. I am also motivated to build a desk that is modern and doesn't age with time.
