## **PRODUCT**

Resin Dining Table

My intention is to design and construct a “High-Quality Piece of Furniture” for use at home. I have decided to design and build a dining table as I believe it will allow me to apply both current woodworking skills and encourage me to learn more.

I propose creating a table that is aesthetically pleasing and durable. The dining table will use traditional forms of woodworking as well as some contemporary elements in order to create a unique design that goes with some of the other furniture in my house.
